Office Action Summary

Application No.

10/602,299

Applicant(s)

BOYLE ET AL.

Examiner

DAVID VU

Art Unit

2818

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 April 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-12, 17-19; 21-23 and 27-31 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-12 and 27-29 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☒ Claim(s) 1-12, 17-19; 21-23 and 27-31 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 11/28/03 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/ Restriction

1. Applicant's election of Group II (Claims 1-12 and 27-29) filed on 04/07/05 is acknowledged. The traverse is on the ground(s) that "product claims require plasma sprayed silicon layers". This is not found persuasive because the patentability of a product by process claim is determined by the final product, regardless of how actually made, *In re Hirao* 190 USPQ 15 at 17 (footnote 3).

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 9 recites the limitation "wherein a bevel is formed" in page 3. There is insufficient antecedent basis for this limitation in the claim.
3. Claim 10 recites the limitation "wherein another of said parts" in page 3. There is insufficient antecedent basis for this limitation in the claim.
4. Claim 12 recites the limitation "wherein a hole passes through a first one of said parts and said second one of said parts..." in page 3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 and 5-12 are rejected under 35 U. S. C. 102(b) as being anticipated by Noguchi et al. (US Pat. 5,211,761, herein after Noguchi).

Regarding claims 1-3, Noguchi in fig. 1 discloses an adhesive layer 2 is formed by atmospheric plasma spraying at 500°C between the silicon substrate 1 and silicon film 3 (col. 2, lines 37-60 and col. 3, lines 38-46).

Regarding claim 5, Noguchi discloses that plasma spraying includes injecting silicon powder into a plasma of a gas (col. 3, lines 31-37).

Regarding claims 6-7, Noguchi discloses that the powder comprises particles having diameters in a range of 10 to 44µm (col. 3, lines 31-37).

Regarding claims 8-12, these limitations are drawn to the manner in which the device is shaped; such intended use or structural limitations do not distinguish over the process of Noguchi.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 27-29 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Niemiowski et al. (US Pat. 6,056,123) in view of Noguchi (US Pat. 5,211,761).

Niemiowski discloses in figs. 1-4 a method of joining the parts of a silicon substrate support fixture comprising (a) first and second silicon bases 2 each having mortise holes 7 formed therein and (b) a plurality of legs 1 comprising silicon (col. 3, lines 13-14) having teeth cut therein for supporting a plurality of substrates 4 in parallel relationship, and inserted into mortise holes to form respective seams between respective pairs of bases 2 and legs 1, method

comprising the step of coating silicon across seams to form layers of silicon bonded to said legs 1 and bases 2 across seams (see Abstract).

Niemirowski fails to disclose the step of joining two silicon parts is performed by using plasma spraying silicon. However, Noguchi in fig. 1 teaches an adhesive layer 2 is formed by atmospheric plasma spraying at 500°C between the silicon substrate 1 and silicon film 3 (col. 2, lines 37-60 and col. 3, lines 38-46). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the invention of Niemirowski by using plasma spraying silicon process as taught by Noguchi because of the good melting properties of the spray particles with good adhesion to the silicon layers and moderate heat transfer to the part.

7. Claim 4 is rejected under 35 U.S.C. 103 (a) as being unpatentable over Noguchi (US Pat. 5,211,761) in view of Wang et al. (US Pat. 6,787,195, herein after Wang).

Noguchi in fig. 1 teaches an adhesive layer 2 is formed by atmospheric plasma spraying at 500°C (col. 2, lines 37-60 and col. 3, lines 38-46) but fails to disclose the temperature is no more than 200°C. However, Wang teaches that substrate is maintained at about 100-500°C during the plasma spraying process (col. 10, lines 50-53). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the process of Noguchi in view of Wang, by selecting a suitable temperature since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or working ranges involves only routine skill in the art. In re Aller, 220 F.2d 454, 456, 105 USPQ 233, 235 (CCPA 1955).

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Vu whose telephone number is (571) 272-1798. The examiner can normally be reached on Monday-Friday from 8:00am to 5:00pm. If attempt to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on (571) 272-1787. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR, Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
